

# OcuDyne II

*New and Improved 2005 Formula*

Item #51080  
200 Vegetarian Capsules

The OcuDyne formulas were originally formulated for NutriCology® by Jonathan Wright, M.D. and Alan R. Gaby, M.D. **OcuDyne II New and Improved 2005 Formula** adds natural vitamin E mixed tocopherols high in gamma-tocopherol and tocotrienols, vitamin D, alpha-lipoic acid and lycopene to the existing formula. Together with the existing vitamins, antioxidants, key amino acids, minerals, bioflavonoids such as quercetin, lutein and zeaxanthin, and extracts of Ginkgo and bilberry, these nutrients offer superior support to the structural integrity and function of the eye.\* In particular, lutein is a powerful antioxidant known to be deposited especially in the lens and the macular region of the retina, the area responsible for central vision.\* This new, expanded formula may be used as a multivitamin, multimineral formula as well.
